Dear JJ,

On behalf of the entire ISPO Textrends Team, I would like to congratulate and thank you for your participation in the Spring/Summer 2025 edition of the ISPO Textrends Award !

I am delighted to inform you that the jury came together to evaluate your submitted products and unanimously agreed on the following official ranking:

Company Name	Product Name	Category	Ranking
Uni-win International Corporation	LC39X2WKT2PTPE-HL3	Membrane & Coating	Top 10
Uni-win International Corporation	UW-LC38WKTD2F2TPEDFW120-HL3	Membrane & Coating	Top 10
Uni-win International Corporation	UP-SPGAWO5PTPEBRNSH-HL3	Soft Equipment	Top 5

Congratulations on behalf of the jury members and the ISPO Textrends team !

What comes next for the awarded companies:

- You will receive the invoice for your participation in the Textrends Award tomorrow. Please, proceed with the payment early on, so we can share your benefits with you.
- Once we have received a confirmation of payment, I will send you the Textrends award labels and the professional pictures of your products.
- Foursource's team will reach out to you to introduce you to your existing or new Foursource profile.
- Your awarded products will be added in your digital Foursource showroom by us.
- ISPO and Foursource will officially communicate the results of the Spring/Summer edition one week before Outdoor by ISPO (4th - 6th of June).

I hope you are as excited about this news as we are.

If you have any questions, don't hesitate to reach out to us.

All the best,

Your ISPO Textrends Award team

Categories for performance textiles & components

Innovative fabrics, fibers, trims, and accessories can be entered in the following 10 categories. At the jury meeting 2 categories will be added: Accelerated Eco and Performing Finishes.

Base Layer

Next-to-skin fabrics with pre-shaping, support, thermal or moisture management performance. Softness, comfort, anti-bacterial or eco-friendly properties are added values.

Second Layer

Fleece fabrics, lightweight protective fabrics and performance linings, stretch or non-stretch. Advanced thermal management. Natural fibers from wool and cotton sustainable fibers, including cellulosic, work alongside next generation synthetics, both virgin and recycled.

Outer Layer

Lightweight but ultra-resistant woven shell fabrics, with surface performance. Stretch, waterproof, windproof, breathable feature for ultimate protection against the elements. High tenacity micro light rip stops work alongside matte and bright woven fabrics.

Membranes & Coatings

Technical membranes, stretch, waterproof, windproof with two or three layers. Reflective and UV-resistant are added values. Teaming function with fashion as colored and printed graphics combine.

Street Sports

Fabrics range from ubiquitous denim with new performance levels to lighter functional fabrics and finishes with a fashionable edge that meets the demand of today's urban offering for second and outer layers.

Soft Equipment

Performance products for tents, backpacks, sleeping bags, shoes, etc. Lightweight, durable, abrasion-resistant, UV-protecting, waterproof, etc. are required benefits.

Fibers & Insulation

Traditional feather down, hollow and cross-section man-made or natural fibers with enhanced benefits for activewear. Biomimicry features through virgin and recycled synthetic fiber delivery, with thermal regulating finishes offering added warmth.

Trims & Customisations

Films and tapes for protective sealings and welded applications feature. Technicity combines with creativity, as technical ribbons, cords, embossing and transfers offer the opportunity to create a customized signature style.

Accessories

Essential ingredients ranging from zippers to buttons and snappers in a wide range of materials. Innovation features in lightweight, durable and waterproof functionality, strong performance essential to the physical activity and the life of a product.

Beachwear

From scuba to swimwear, functional fabrics are key to the increase in water sports. Quick dry, UV+, salt, sand and sun lotion resistant allow a higher level of flexibility and durability. Recycled synthetics, especially from the ocean appeal with beach-to-street apparel adapting to different occasions and adding to the eco aspect of less is more.
